

# MEDICATION DISPOSAL PROGRAM OVERVIEW

Diversion and misuse of prescription drugs is a serious health problem in America and an epidemic that can no longer be ignored. ARXG's Mail-In Take Back program provides a quick, easy, and compliant platform for your facility to assist in the effort to combat drug diversion and misuse. Our secure anti-phishing kiosks, patented liner system and robust management portal provide you with a complete program designed to safely dispose of unused medications securely and efficiently. Thousands of facilities trust ARXG to help prevent diversion and misuse of controlled and non-controlled medications.

## WHY ARXG?

ZERO ACCESS BAFFLE  
RESTRICTED HOPPER

ANTI-PRY DOOR JAMB  
DOUBLE LOCKS

COLLECTED ITEMS ARE EASILY  
ACCESSIBLE

PADLOCKS ARE  
EASILY CUT OFF

- Customizable Kiosks
- High Security
- Anti-Phishing Technologies
- User Friendly Portal
- Lifetime Warranty\*
- Easy Installation
- ADA, DEA, DOT, and Title 21 Compliant

## KEY BENEFITS

- KMS Technology
- No Administrative Burden
- Real-Time Tracking and Notifications
- Online Portal
- Easily Re-Order Kits
- No Additional Supplies Needed
- Patented Liner System

## WATCH OUT FOR

- Cabinets that have padlocks: can easily be cut off with a bolt cutter
- Cabinets with external anchors: allow for anyone to uninstall the cabinet
- Cabinets with hoppers that expand wide-open: allow contents to be accessed and/or removed through hopper opening
- Cabinets that don't arrive ADA Compliant: some require modifications to be considered truly compliant

## HOW IT WORKS

Insert our patented liner into your kiosk and lock the access doors. You're ready to collect!

Take the liner out of the kiosk and secure the box using the pre-applied adhesive.

Once destroyed, a Certificate of Destruction (Form DEA-41) will be available in your online portal.

If you do not have our KMS technology, the full service take back program is still simple! You'll manually inspect the liner with a co-worker to verify current capacity as there will be no fill sensor or weight plate

\* Stainless steel parts and assemblies have a lifetime warranty against material rust through - powder coating not included.  
Non stainless assemblies have a three year warranty against normal wear and tear.

# MEDICATION DISPOSAL GETTING STARTED

## 1. CHOOSE A KIOSK

We understand that starting a medication diversion program for your community is an important responsibility, and you can't afford to have it fall into the wrong hands. Your goal is to safely collect unused medication and prevent diversion. ARXG helps you achieve that goal by providing an elite kiosk solution that exceeds the DEA specifications with many standard security attributes. Just a few examples of the carefully engineered features of ARXG kiosks include: a double-locking access door with cam locks, an anti-pry doorjamb, and most importantly a zero-access baffle on the hopper. Many competitors claim to have a DEA-compliant solution yet offer an inferior kiosk that can easily be compromised with unrestricted hoppers, padlock access or single-lock doors.

In addition to exceptional safety features, ARXG offers customized branding of your kiosk. Unlike our competitors, we understand that you are making the investment in your community, and think you deserve the recognition. We can acknowledge your facility and/or funding partner with logo branding and content tailored to your needs. **Competitors prominently display *their* logo – we display *yours*!**

## 2. CONFIRM THAT THERE IS A TRACKING/MANAGEMENT PORTAL

Our management portal tracks your medication disposal through the entire collection process, from creation to destruction. Access detailed reports and analytics of your program's performance and receive real-time updates on your unused medications certified destruction.

### With our Management Portal you can:

- Track your shipments with real-time updates from creation to destruction
- Access your Certificate of Destruction for all shipments at any time
- Set up notifications for routine maintenance or inspections
- View reports and analytics from day one
- View shipment and order history
- Order new kits

# MEDICATION DISPOSAL

## GETTING STARTED

### 3. LINERS

Similar to our kiosks, our patented ARXG liners exceed all DEA requirements. Two key factors differentiate our liner system – safety and convenience. After collection of meds in your kiosk, the transport process from your facility to the destruction site is the next biggest risk of a takeback program. ARXG patented liners give you peace of mind that your shipment will arrive intact with our double-sealed inner bag and the heavy-duty construction of our outer liner box.

Secondly, the ARXG design makes the process simple for the end-user. Our box comes complete with the tape already adhered to its walls for easy assembly.

### 4. KMS SOLUTION

Take the administrative burden away from managing your kiosk. With our new, user-friendly, Kiosk Management System you can monitor your kiosk online anywhere, anytime. The KMS System uses LTE technology through the AT&T network to keep in touch with your kiosks which eliminates any firewall or WiFi issues.

Our KMS System will notify you in real-time when the maximum weight to be DEA and DOT compliant has been reached, when the liner is full, or if the access door has been opened. You can also check online at any time to see the overall health of the kiosk, the battery power, the current weight, or approximately how full the liner may be.

### 5. DISPOSAL

After the liner is full and sealed, it will be transported via prepaid UPS shipping to one of the largest waste-to-energy facilities in the nation to minimize the impact of the waste. Once the liner contents are destroyed, we ensure full compliance with the DEA by providing a Certificate of Destruction (Form DEA-41) upon completion. The certificate can be viewed at any time on our online tracking portal. With our user-friendly online portal, you can track your shipment from start to finish.

### ARXG HAS YOU COVERED

American Rx Group has become a trusted leader in the full-service unused pharmaceuticals take back industry. We lead the way when it comes to best-in-class disposal solutions coupled with robust online portal reporting. Our expert sales staff will help identify a solution that works for you. ARXG's experience allows you to buy with confidence, knowing we have you covered where the competition falls short.
